

Promoting Private Sector Employment project– PPSE is implemented by SwissContact, the Project aims to enhance productivity and generate additional revenues and employment from SMEs in selected sectors, thus enabling service providers and providing inputs to develop advanced and stable products (goods and services) and manufacturing practices. Initially, the project focuses on two main sectors: food processing sector and tourism sector, while the manufacturing sector will be selected within first six months of the implementation phase, that of textile production or wood processing.

The opportunity fund is a grant mechanism that supports the establishment and sustainable development of private sector employment for youth. It will support interventions that test new, innovative and risky ideas, at the same time will offer the possibility of changes in the market leading to a significant growth of private sector and promising job creation.
